Dear Guest

We thought that you would be interested to see these latest construction images of Palazzo Versace and D1.

Recently the 5th tower crane became operational on the Palazzo Versace site. This allows access to the balance of the site enabling work to commence on these areas. The structure is continuing and is currently at level 2. Palazzo Versace is scheduled to be at level 5 by the end of the year. To see all construction images to date please refer to the Construction Gallery on the website www.Palazzoversace.ae.

At D1 the piling operation is complete - this can be seen in the picture. The raft (which is the main footing at the base of the building) has commenced as has the steel reinforcement. It is expected that the building tower will start coming out of the ground by December, following the completion of the 3 underground basements. To follow the progress of construction please visit the website www.d1tower.com and follow the links under design and inspiration.
